---

I agree with Eric's assessment that this is just a matter of bring me up to speed on what is available on the portal. I've spoken with Tom about my current request to make sure the files I have:

1. have all the data I need.
2. do not have duplicate records between tables

Thanks,  
Arron

Sandy, Arron is the contact. I spoke to him this morning. There seems to be confusion about the different files and which data is in each file. For example, there was a "sediment" file that had PCBs, Dioxin, Metals and conventional data in it while other files had names related to the chemicals contained within (e.g, pesthrbsvocvoc or something similar). Anyway, my preference is for Tom and Arron to have the discussion necessary to work out the issues. Hopefully it is just a matter of educating Arron about which data is where.

Thanks, Eric

FW: Round 2 Sediment Data

Eric, our database manager (Tom) is in touch with Aaron Heriford/DEQ. Is this the same contact you were referencing in your e-mail to Lora Boehlke? If so, Aaron is sending Tom a list of questions & data requests.

Unfortunately, Tom can't pinpoint the problem you mention below. The database Aaron received has a completely different name than the updates we post. Tom is looking into more but it's unlikely we would exclude DDTs because we export the data by complete data set.

Will keep you posted.

Sandy

Lora, some of our folks have informed me that the DDT, DDE and DDD  
sediment data is not in the access data base file on the LWG server.  
Unfortunately, our internet connection is very slow this morning and I  
have not been to verify this. Can you look into it.

Thanks, Eric
